The tornado tracked intermittently along a path 18 miles long, with a maximum width of 150 yards. There were several areas along and near the path with evidence of straight line wind damage.

The tornado fist touched down just inside the Warren County line, near the Edmonson County border, about 6.5 miles southwest of Brownsville around 6 pm CDT. The tornado traveled roughly along the Warren and Edmonson County lines, doing damage in Warren County. After one mile, the tornado lifted and descended back to the ground about three and a quarter miles later. While it was aloft, significant straight-line wind damage occurred along a 2-mile wide path along both sides of the county line. After descending to the ground again 3.5 miles northwest of Smiths Grove, the tornado remained on the ground for more than 7 miles, doing its last structural damage in the county less than a half mile southwest of Hays around 618 pm CDT.

In Barren County, the tornado passed over mostly rural cropland exhibiting little damage, but destroyed two large barns and damaged a home about 6 miles west of Glasgow in Barren County around 627 pm CDT before finally lifting shortly thereafter.

This EF-1 tornado produced wind speeds up to 105 mph along its intermittent 18 mile path length. Damage was done to hardwood trees, barns, homes and outbuildings. A well-defined rotation pattern could also be seen in tall grass.

06/11/09 18:04 CST	0	Source: NWS Storm Survey			

This short-lived tornado was only on the ground for approximately 1.3 miles, touching down in far southern Metcalfe County, and lifting in far northern Monroe County. Along its path of about 3 minutes in duration, the tornado had a maximum width of 150 yards and did damage to a metal shed, minor damage to the roof and porch of two separate homes, moved a tobacco barn off its foundation, and snapped numerous trees and tree limbs.

The tornado first touched down in extreme southern Metcalfe County about 1.2 miles west-northwest of the town of Cyclone around 701 pm CDT. The tornado moved over primarily rural pasture and cropland into far northern Monroe County, where it lifted about one third of a mile south of Cyclone around 704 pm CDT.

This EF-1 tornado produced top wind speeds of 105 mph.

RUSSELL COUNTY 7.0 E JAMESTOWN [36.98, -84.94]							
	06/30/09 22:18 CST		0	Hail (1.00 in)			
	06/30/09 22:22 CST		0	Source: Trained Spotter			

Quarter sized hail fell for four minutes ending at 1222 AM EDT.

Afternoon thunderstorms were mainly of the garden variety across south central Kentucky. However a few of the stronger storms did produce some sub-severe hail, and one storm intensified enough to produce golf ball sized hail.
